Educational Psychology

Educational Psychology: Windows on Classrooms, 10e

Paul Eggen & Don Kauchak
©2015 • 752pp • Paperback

Course: Introduction to Educational Psychology

This significantly revised Tenth Edition focuses on applying theories and research in educational psychology to an educator's work in the classroom. Using an integrated-case approach, authors Eggen and Kauchak begin each chapter with a case study taken from actual classroom practice and then weave the case throughout the chapter, extracting specific illustrations and, in some instances, using dialogue directly from the case to emphasize the application of chapter content to the classroom setting.

Educational Psychology, 15e

Anita Woolfolk
©2024 • Paperback

Course: Introduction to Educational Psychology

Educational Psychology: Active Learning Edition uses clear language to explain educational psychology's role in the classroom. This practical resource includes guidelines, cases and tips from expert teachers. Theory and practice are examined together, showing how research on child development, cognitive science, learning, motivation, teaching and assessment can be used to solve the everyday problems of teaching. This edition features expanded analysis of the brain and neuroscience; integrated coverage of social-emotional learning and trauma-informed teaching; and a bold approach to issues of identity, race and privilege.

Adolescence and Emerging Adulthood, 5e

Jeffrey Jensen Arnett

©2013 • Paperback

Print	VitalSource/Kortext eBook
9781292042664	9781292051710

Course: Adolescent Development

Grounded in a global cultural perspective (within and outside of the US), this text enriches the discussion with historical context and an interdisciplinary approach, including studies from fields such as anthropology and sociology, in addition to the compelling psychological research on adolescent development. This book also takes into account the period of emerging adulthood (ages 18-25), a term coined by the author and an area of study for which Arnett is a leading expert.

Adolescence and Emerging Adulthood: A Cultural Approach, 7e

Jeff Jensen Arnett & Lene Arnett Jensen

©2024

Available as a Revel course only.

Revel
9781292737034

Course: Adolescent Development

This text helps you examine this dynamic age period through the lens of the world's diverse cultures. Utilizing a multidisciplinary approach, the authors explore the impact of both cultural and historical context upon development. The text is distinguished by its emphasis on the period of emerging adulthood (ages 18 to 25), a growing area of study.

The 7th Edition offers new end-of-chapter reflections that encourage you to consider the big picture. Fresh content in each chapter pertaining to cultural similarities and differences helps you see how the development of adolescents and emerging adults is influenced by the culture in which they live.

Praised for its non-intimidating writing style, the text emphasizes concepts over formulas. The Sixth Edition contains 492 new excerpts drawn from recent journal articles, as well as three new chapters.

A Taxonomy for Learning, Teaching and Assessing: A Revision of Bloom's Taxonomy of Educational Objectives, Abridged Edition

Lorin W. Anderson, David R. Krathwohl, Peter W. Airasian, Kathleen A. Cruikshank, Richard E. Mayer, Paul R. Pintrich, James Raths & Merlin C. Wittrock

©2013 • 336pp • Paperback

Print
9781292042848

Course: Advanced Education Psychology

This revision of Bloom's taxonomy framework is designed to help teachers understand and implement standards-based curriculums as well as facilitate constructing and analyzing their own. A revision only in the sense that it builds on the original framework, it is a completely new manuscript in both text and organization. Its two-dimensional framework interrelates knowledge with the cognitive processes students use to gain and work with knowledge. Together, these define the goals, curriculum standards and objectives students are expected to learn. The framework facilitates the exploration of curriculums from four perspectives – what is intended to be taught, how it is to be taught, how learning is to be assessed and how well the intended aims, instruction and assessments are aligned for effective education.

The Life Span: Human Development for Helping Professionals, 3e

Patricia C. Broderick & Pamela Blewitt

©2013 • 628pp • Paperback

Available with MyLab Education

Course: Lifespan Development (Topical Approach)

The first developmental textbook written specifically for helping professionals and graduate-level students, *The Life Span: Human Development for Helping Professionals* provides an in-depth look at the science of human development and how it applies to the fields of counseling, social work and psychology. Using counseling applications, case studies, special topics boxes and journal questions, the text introduces developmental theories and research within the context of clinical practice.

Course: Mathematics Methods in the Elementary School

Elementary and Middle School Mathematics: Teaching Developmentally illustrates how children learn mathematics and then shows pre-service teachers the most effective methods of teaching PreK-8 math through hands-on, problem-based activities.

As teacher candidates engage with the activities, they boost their own knowledge of the math and learn concrete, developmentally appropriate ways to incorporate problem-based tasks in their classrooms. Examples of real student work and new common challenges and misconception tables allow readers to visualize good mathematics instruction and assessment that supports and challenges all learners.

Learning Mathematics in Elementary and Middle Schools: A Learner-Centered Approach, 5e

©2013 • 448pp • Paperback

Print
9781292042053

Course: Mathematics Methods in the Elementary School

Learning Mathematics in Elementary and Middle Schools uses NCTM standards and authentic videos to illustrate and encourage a learner-centered approach to instruction. It helps you learn to evaluate how children think mathematically and how to link that knowledge to developmentally appropriate teaching practices.

Science in Elementary Education: Methods, Concepts and Inquiries, 11e

Joseph M. Peters & David L. Stout

©2013 • 558pp • Paperback

Print
9781292041346

Course: Science Methods in Elementary School

Substantially rewritten to focus on inquiry teaching and learning as espoused in the National Science Education Standards, this new edition will prepare pre-service teachers to plan, facilitate, adapt and assess inquiry experiences consistent with today's science classroom. It accomplishes this by implementing the 6E model of inquiry teaching, addressing the planning and needs of inquiry teaching classrooms and describing the materials teachers need to get up and running.

Social Studies in Elementary Education, 14e

Walter C. Parker

©2013 • 456pp • Paperback

Print
9781292041339

Course: Social Studies Methods in the Elementary School

This new edition of the most popular elementary social studies methods text on the market, houses a wealth of content, strategies, tools and resources for teaching K-8 social studies. Writing with the same clarity, friendly tone and solid content of previous editions, Parker details the mission of social studies education and explores the many ways this mission can be made to serve the full complement of learners in a diverse multicultural society. He lays out the elements of a strong social studies curriculum, explains effective teaching methods and presents a wealth of field-tested examples, exercises, activities and lesson plans that will enliven every social studies classroom.

Teaching in the Middle and Secondary Schools, 10e

Joanna Carjuzaa & Richard D. Kellough

©2013 • 376pp • Paperback

Print
9781292041537

Course: General Middle School/Junior High School Methods

Now in its Tenth Edition, this remains an influential text for pre-service teachers studying middle and secondary school teaching methods. Written by an expert on multicultural education, diversity and cultural differences among students are thematically integrated throughout this text and applied to all areas of study. Containing activities that focus on student-centered learning, real life scenarios that apply critical teaching skills, in-chapter exercises and end-of-chapter activities, this text is both practical and applicable as a valuable instructional text and future resource for professionals. This edition is tech savvy and updated, including a greater focus on middle school teaching methods and curriculum, twenty-first century skills and analysis of student assessment and achievement.

Teaching Science for All Children: An Inquiry Approach, 5e

Ralph Martin, Colleen Sexton, Teresa Franklin, Jack Gerlovich & Dennis McElroy

©2013 • 580pp • Paperback

Print	VitalSource/Kortext eBook
9781292041803	9781292054315

Course: Science Methods (Middle School)

This text employs an inquiry model throughout, especially apparent in the design of its learning cycle lesson plans. Engaging Questions, Exploration, Explanation, Expansion and Evaluation make up the Es of this modern learning cycle based on the model first invented by Robert Karplus as part of the Science Curriculum Improvement Study in the 1960s. The text provides methods for future teachers to foster awareness and understanding among their students of the nature of science; to construct understandings of and connections between various science content; to encourage application of science inquiry processes in the classroom; and to develop their students' understanding of the interactions between science, technology and society.
