Course: Introductory Sociology

Sociology empowers students to see the world around them through a sociological lens, helping them better understand their own lives and the world we all share. Author, John Macionis, takes students step by step through the theories and research that make up the discipline, helping them to find and use the science of social behavior in everyday life. In addition to extensively updated data, the Sixteenth Edition offers engaging discussions of hot-button contemporary topics such as the increased proliferation of social media as well as expanded coverage of race, class, and gender.

Sociology: The Study of Society

Ed Vaughan

9780130280589 • ©2002
418pp • Paperback • £29.99

Course: Introductory Sociology

This holistic text stresses the impact of society on social arrangements and social behaviour, and emphasizes the interdependence of societies – which are increasingly influenced by international corporate capitalism and international government and non-government organizations. It uses a comparative and historical perspective to illustrate how Sociology developed, patterns of social change, and focuses on the economical/political arena as a dominant source of it.

Criminology

Criminology: An Interdisciplinary Approach

C. Ray Jeffery

9780131935914 • ©2005
496pp • Paperback • £32.99

Course: Introduction to Criminology

An examination of criminology as both a behavioral science and an interdisciplinary science. Argues for a criminology based on a synthesis of biology, sociology, psychology, and other behavioral sciences. Suggests prevention and treatment as an alternative to the current retribution and deterrence theories of crime and criminal justice. Emphasizes crime prevention through environmental design and bioenvironmental theories. Discusses modern genetics, brain sciences, and psychology as critical aspects of behavior. Debates legal vs. scientific approaches to criminal behavior.

Exploring Research, 9e

Neil J. Salkind

9781292156293 • ©2017
288pp • Paperback • £45.99

eBook: 9781292156309 • £37.00

Course: Research Methods in Sociology

Exploring Research makes research methods accessible for students – describing how to collect and analyze data, and providing thorough instruction on how to prepare and write a research proposal and manuscript. Author Neil Salkind covers the research process, problem selection, sampling and generalizability, and the measurement process. He also incorporates the most common types of research models used in the social and behavioral sciences, including qualitative methods. The Ninth Edition explores the use of electronic sources (the Internet) as a means to enhance research skills, includes discussions about scientific methods, and places a strong emphasis on ethics.
