

Student Success Program

Help each learner thrive
beyond college!

How do we ensure that learners gain the skills to thrive?

With **robots expected to replace 800 million roles** by 2030, the most desirable jobs of the future haven't even been invented yet.

Companies find that most college graduates are **not ready for the workplace** because they lack the soft skills such as communication, creative thinking, organization, and attention to detail.

As universities, you have a role to prepare your learners for the future by addressing this skills gap. If you're unsure where to start, **that's where we come in.**

Pearson's Student Success Program

The skills required for the workplace are also required to lead a successful university life. With **Pearson's Student Success** you can support your learners in:

- developing academic success and employability skills
- recognising the skills they have or need to develop for their possible career paths
- documenting their application of skills for internships and job interviews

The online program, can be used institution-wide, by central support services or on individual modules. It's designed to help you get the best out of your learners during their studies and beyond.

“

If I had to **RATE THE COURSES** I took this year, **STUDENT SUCCESS** would be **TOP OF THE LIST.**

Luminous Education students, Jordan

I realized how much

TIME I WAS WASTING so I decided to **CHANGE.** Now I am spending **MORE TIME WITH MY FAMILY.**

Princess Nourah Bint Abdul Rahman University, student, Saudi Arabia

”

Digital Badging

By starting with a diagnostic assessment, your learners will discover their strengths and weaknesses. Furthermore, after completing all modules, learners will take a post-assessment to measure their progress and achievement, and they will earn a digital badge to use and share online.

Research-based Tools for Success

Conley Readiness Index (CRI) — determines overall skill set and readiness for learning.

Created by Dr. David T. Conley, this research-based, diagnostic tool measures and reports a learner's college and career readiness around the Four Keys framework — Think, Know, Act and Go. It reveals how ready learners are and what it takes to succeed.

CRI self-assessments help learners:

- 1) Consider career options that fit their interests and talents
- 2) Actively think about why they've chosen to attend college
- 3) Become more focused to build the required skills.

20 College Readiness Modules

These modules help learners acquire and build a skill set for ongoing personal and professional development.

Critical thinking

Self management skills at work

Goal setting

Online learning

Reading to learn

Problem solving

Teamwork

Stress management

Learning preference

Test taking skills

Time management

Workplace communication

Communication

Information literacy

Note taking skills

Understanding growth mindset

Understanding diversity and ethics

Wellness

College transition

Memory and studying

“

AT FIRST I WAS SKEPTICAL

as a top performing medical student, that I need this programme. But after I took the

NOTE TAKING MODEL and

tried it myself, it **REALLY**

HELPED ME break up large reading parts and helped with memorizing the **IMPORTANT BITS**.
